

# Music Festivals Podcast

## Full Length Music Festival Documentary

The Festival Documentary Package delivers a cinematic, story-driven film that captures the heart, culture, and impact of your festival. Rather than a simple highlight reel, the film is built around 4-6 character-driven narratives – drawing from promoters, artists, vendors, attendees, and staff – to tell an authentic story of the community behind the event.

Production blends intimate interviews with live performance highlights, behind-the-scenes moments, crowd energy, venue and festival B-roll, and aerial drone footage (where permitted). The result is a polished, emotionally engaging film that reflects the true vibe of the festival. This documentary becomes a long-term asset – used to drive ticket sales, attract sponsors, support grant applications, and preserve the story of the festival for years to come.

### Deliverables

- 20-30 minute documentary film, promoted across MFP's channels
- 1-2 minute cinematic trailer (16x9) for marketing and promotion
- 10-20 short-form videos for social platforms.
- All raw footage is provided to the festival at no additional cost for future marketing and archival use.
